### **About VIVUS**

VIVUS, Inc. is a pioneer in the research and development of proprietary products to restore sexual function for women and men. VIVUS' current product pipeline includes four investigational products in late stage clinical development. For women, VIVUS has completed a Phase 3 program for Evamist™ for the alleviation of menopausal symptoms, and initiated a Phase 2B program with ALISTA™ for female sexual arousal disorder. Additionally, the company has completed Phase 2 development of Testosterone MDTs® for the treatment of hypoactive sexual desire disorder (HSDD). The MDTs system is a patented new-generation, transdermal drug delivery technology that delivers drugs directly through the skin. For men, VIVUS has completed Phase 2 development of avanafil for erectile dysfunction. The company currently markets MUSE® (alprostadil) suppository for the treatment of erectile dysfunction in the U.S. and internationally through distributors.
